CSS
- Cascadding Style Sheet
- It can be applied in 3 ways
1. Inline CSS - by using style attribute inside every tags
2. Internal CSS - by using the style tag inside the head tag
3. External CSS - by creating .css file and linking to the html page using tag

Selectors
    - It is the tag,attribute,id,class name that we use in the case of internal css to
    apply the css property

Types of selectors
1. Element Selector
2. Multiple Element Selector
3. Id selector
4. class selector
5. Attribute selector
6. descendent selector
7. child selector
8. pseudo selector
9. universal selector

border
margin
padding

float -> display is not considerd
display : flex

Grid ->

Bootstrap   <div class="container-sm">   <576

                 <>
